Mr. Kreis,

I received your letter of August 5, 2011, expressing interest in US Patent Publication 2008/0230041("High Efficiency Alcohol Fuel Engine").

I would be happy to talk to you about developing this engine technology. We consider the technology to be very promising, and we are looking for the best way to promote its development and commercialization. Please note that the patent application has not yet issued as a patent, so you currently do not need our permission to practice the invention, and we are willing to discuss a patent license to cover you for when the patent is granted. The main thing we would need from you for a patent license is a viable and credible business plan for the technology. The business plan could be protected as confidential if desired.

Dr. Matt Brusstar would be the best contact for providing you information on engine development and public test data. His phone # is 734-214-4791 and his email is brusstar.matt@epa.gov I look forward to hearing from you.
